Unit	362×126	10~12	18	0.81	20

<Note>

* A tile-uniting material may be visible through the joints between tiles. * Mounting lead time is 1 week at the shortest. * This is randomly mixed unit of approx. ②37x60x12mm travertine look and approx. ①75x60x10mm split surface. * Because the tiles are split on the sides as design intent, tile shapes are different vertically and joints are not straight. * Joint of 3 to 4mm vertically and 3mm horizontally is recommended. * Please check the availability even for stocked item. (Approx. 45 days if out of stock) * Minimum order quantity is 300m² for made-to-order color. The price may vary depending on the color. (Subject to confirmation.) * In addition to ceramicware natural shade variation, it always has color, shade and size variation between batch to batch. * CB-2 has wide shade variation and pattern due to mixing of 2 different clays. * Color and texture in print may look different from that of actual pieces. Please check the sample before final selection. * Specifications may be changed without notice.

<Installation Precautions>

* Because this is unglazed rough texture, tuck point grouting is recommended. Do not apply the grout to surface. * Please note it is difficult to remove the adhesive once it stuck to surface. * Please do not install without joint, otherwise it will cause chipping edge and tile falling off.

<Recommended Installing Method>

This tile requires use of adhesive for installation.
